DIGITAL VIDEO DOOR ENTRY SYSTEM

DIGITAL PANEL CUTTING EDGE

The **CITYLINE digital panel** is the video door entry panel with keypad to manage medium and large sized buildings.

It includes a colour camera as standard, an LCD screen which acts as an electronic directory and a numeric keypad to make house calls.

It is simple and intuitive to use.

This new model stands out for the metallic nature of its materials, reliability and durability and the elegance of its design.

Cityline Digital video panel with keypad.

NEXT GENERATION OF PANELS

The new Cityline is more robust, luxurious and of greater esthetic and functional quality. Manufactured in highly weather resistant anodized aluminium profile. Compatible with the previous Cityline model, allowing immediate installation.

Cityline

Cityline New

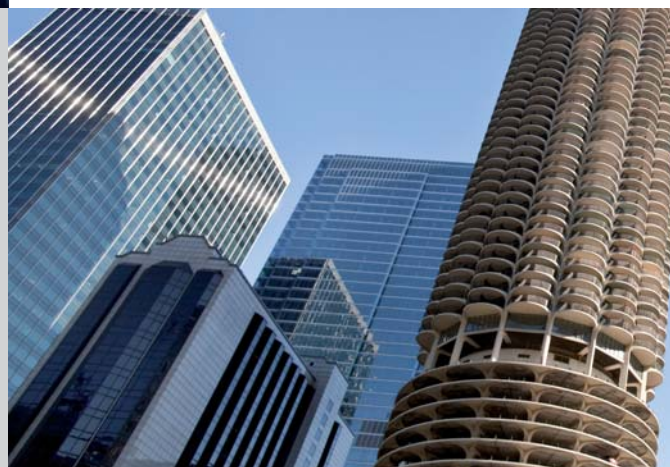

One single model for all building types.

Digital panels with keypad let you manage up to 199 homes in the same building in BUS2 and VDS versions, and up to 9999 homes in the MDS Digital version.

FEATURES

Compact audio-video module. Colour camera as standard. New metallic keypad with airtight contacts. High contrast LCD display.

Maximum weather resistance

A mechanical and electronic design unalterable with the passage of time.

COMPACT AUDIO-VIDEO MODULE

Includes built-in powerful high-performance **AMPLIFIER** with volume control to adjust the conversation level. A synthesized message: "The door is open. Please close the door behind you" sounds while the door is opening. Opening time is adjustable from the keypad.

COLOUR CAMERA AS STANDARD

Includes a highly sensitive **CCD Camera** with 3,7mm lens. Additional night vision lighting with 6 LEDs.

A **PAN&TILT** system lets you adjust the lens $\pm 10^\circ$ in line with the panel position.

LCD DISPLAY

High contrast, lets you view the names of the residents and their door codes through a phone book type **DIRECTORY**. The display shows the communication status: The keys let you browse the user and programming menu. Once the door code is entered, press the  key to call the house.

INTUITIVE AND USER FRIENDLY

Select the resident/door from the display or the door number on the keypad press the  directly.

ACCESS CONTROL BUILDING

Through the keypad it is possible to activate the installation's electric lock by entering a PIN code. VDS and BUS2 panels can handle up to 350 codes/users. The digital MDS panel can manage 1020 users.

MAXIMUM SECURITY KEYPAD

The metallic keys are made in zamak and have permanent **BACKLIGHT** to let you see the numbers in poor lighting conditions. The robust design and airtight keys guarantee reliability and durability in any surroundings.
